**General Overview**

**Standards for Privacy of Individually Identifiable Health Information (the "Privacy Rule")**

The Privacy Rule provides for the privacy of patients' health information. All segments of the health care industry, including this outpatient rehabilitation facility, agree that privacy protections must not interfere with a patient's access to or the quality of health care delivery. The following policies and procedures provide guidance to communicate clearly the privacy policies.

The Privacy Rule became effective on April 14, 2001 and was subsequently modified on August 14, 2002. Most rehabilitation providers that are covered by this new rule must comply with the requirements by April 2003. The Privacy Rule is designed to protect individuals' medical records and other personal health information.

- It gives patients more control over their health information;
- It sets boundaries on the use and release of health records;
- It establishes appropriate safeguards that health care providers and others must achieve to protect the privacy of health information; and
- It holds violators accountable.

The Privacy Rule allows patients to make informed choices when seeking care and reimbursement for care based on how personal health information may be used. In particular, the Privacy Rule:

- Enables patients to find out how their information may be used and what disclosures of their information have been made;
- Limits release of information to the minimum amount reasonably necessary for the purpose of the disclosure; and
- Provides patients with the right to examine and obtain a copy of their own health records and request corrections
